Items Supplied >

- 1 FRONT HEADPIPE W/ HEATSHIELD
- 1 REAR HEADPIPE/MUFFLER ASSEMBLY W/ HEATSHIELD
- 2 BILLET MUFFLER TIPS
- 2 BOLT, 1/4" X 1/2" BUTTON HEAD
- 2 FLAT WASHER, 1/4"
- 1 BRACKET, EXHAUST MOUNT
- 2 BOLT, 5/16" X 5/8" FLANGE W/ LOCK PATCH
- 2 BOLT, 3/8" X 3/4" FLANGE W/ LOCK PATCH
- 4 CLAMP, HS-24
- 2 CLAMP, HS-28
- 1 CLAMP, 27-61MSC
- 2 3/8" ID X 1/8" THICK FLAT WASHERS (FOR FXDR 114 ONLY)

Application(s) >

HARLEY SOFTAIL:	
FLFB/FLFBS FAT BOY	18-20
FXBR/FXBRS BREAKOUT	18-20
FXDR 114	19-20

NOTE: DOES NOT FIT FXBB STREETBOB, FXLR LOWRIDER, FLSL SLIM, FXFB/FXFBS FAT BOB, FLDE DELUXE, FLSB SPORTGLIDE, OR FLHC/FLHCS HERITAGE CLASSIC.

Instruction Manual >	6863	Page 1 of 4

PRIOR TO INSTALLATION, MAKE SURE YOUR STOCK HEADPIPE GASKETS ARE IN GOOD CONDITION. IF YOU HAVE ANY DOUBTS AS TO THEIR CONDITION, REPLACE THEM.

Read all instructions carefully and completely before installing your new exhaust system!

- 1. Apply masking tape to any surrounding parts on the motorcycle to protect them from getting scratched.
- 2. Remove the right side battery cover to gain access to the rear O₂ sensor plug. Unplug O₂ sensors on front and rear headpipes from motorcycle wire harnesses.
- 3. If the motorcycle has forward floorboards/controls then the right side floor board/foot peg will need to be removed to gain clearance for removing and installing the exhaust system. Remove the two lower mounting bolts connecting it to the frame and set it aside. It is not necessary to remove the brake lever. See **FIGURE 1**.

FORWARD FLOORBOARDS

REMOVE THESE LOWER BOLTS FIGURE 1

4. Remove the stock exhaust system being careful not to damage the headpipe gaskets. If the headpipe gaskets are in good condition they do not need to be removed from the cylinders. Also be careful not to damage the oil cooler near the front cylinder. Remove and save the flanges, nuts, retaining rings, and O₂ sensors from the stock exhaust as they will be reused.

www.cobrausa-vtwin.com Instruction Manual > 6863 Page 2 of 4 Remove the right side passenger foot peg from the stock exhaust mount bracket and set it aside to be installed at the end of the installation. Then remove the stock exhaust mount bracket from the frame. 7. Install the new exhaust mount bracket using the supplied 3/8" x 3/4" hex flange bolts. Tighten the bolts to factory specifications. See FIGURE 2. NOTE: For FXDR 114 motorcycles, the exhaust mount needs to be spaced outward 1/8" so that the bracket clears the swing arm. Insert the supplied 3/8" x 3/4" hex flange bolts through the bracket, through the supplied 3/8" X 1/8" thick washers, and then into the frame so that the spacer is between the frame and the exhaust mount. Tighten the bolts to factory specifications. For FXDR 114 motorcycles, place the supplied 3/8" X 1/8" thick washers between the frame and the NEW EXHAUST exhaust mount to space MOUNT BRACKET the bracket 1/8" outward. SUPPLIED 3/8" X 3/4" HEX FLANGE BOLTS **FIGURE 2** CLAMP SHOULD BE FLUSH WITH EDGE OF MUFFLER INLET NOTE: MUFFLER BODY SHOWN MAY VARY FROM ACTUAL APPLICATION POSITION 27-61 MSC CLAMP WITH HEX DO NOT SLIDE CLAMP HEAD FACING DOWN PAST SLOTS **FIGURE 3 Continued on Page 3**

- 8. Unwrap the heatshields and headpipes from packaging. Remove the rear heatshield from the rear headpipe and muffler assembly.
- 9. Install the stock flanges, retaining rings and O_2 sensors onto the supplied front and rear headpipes.
- 10. Install the front headpipe (with stock headpipe gasket in place) onto the front cylinder using the stock nuts but **DO NOT TIGHTEN** at this time. Be careful not to damage the oil cooler while installing the nuts.
- 11. Position the supplied #27-61 MSC muffler clamp with hex head facing inward and down as shown in FIGURE 3 and slide it onto the rear muffler inlet tube.
- 12. Install the rear headpipe and muffler assembly (with stock headpipe gasket in place) onto the rear cylinder and slide the lower muffler inlet on to the front headpipe. Use the stock nuts to fasten the rear headpipe to the cylinder but **DO NOT TIGHTEN** at this time. Make sure the front headpipe is pushed in as far as possible into the rear muffler slip.
- 13. Secure the muffler assembly to the exhaust mount bracket using the (2) supplied 5/16"-18 bolts but DO NOT TIGHTEN.
- 14. Make sure the rear muffler assembly and front headpipe are straight and parallel and tighten in the following order; headpipe flanges to the cylinders (slowly tightening opposing nuts), muffler assembly to the exhaust mount and finally the muffler inlet clamp. (NOTE: The muffler inlet clamp should be flush with the end of the muffler inlet when tightened. See FIGURE 3. If the muffler inlet clamp is slid past the slots on the muffler inlet, the clamp will not tighten properly).
